

Calibration Services

Almor offer a wide range of calibration services to enable heat treaters to meet the latest NADCAP, AMS 2750 Rev D and CQI-9 quality standards.

Our calibration equipment and certification are 'traceable to UKAS' and our site engineers are trained to work to a wide range of procedures operated by companies, including AMS 2750D, RPS 953 and ISO 9001 : 2000.

The products and services offered by Almor include:

- **On site calibration**
 - Annual contracts
 - Instrument calibration
 - Temperature uniformity surveys (TUS)
 - System accuracy tests (SAT)
 - Vacuum gauge calibration
- **Thermocouples**
 - Control and monitoring
 - System accuracy test
 - Temperature uniformity surveys

TUS reports are a mandatory part of AMS 2750D pyrometry compliance.

All Almor TUS are supported by a comprehensive report which meets the requirements of AMS 2750D.
